PRESS RELEASE

May 19, 2014 Las Vegas, Nevada

WetStone Releases C-TAK v1.2 for EnCase® App Central @ CEIC 2014

WetStone is pleased to announce the release of C-TAK v1.2, our popular EnCase® App Central application. C-TAK provides investigators the ability to instantly add cyber threat detection to any EnCase investigation. Version 1.2 adds Password Crackers, Network Sniffers, Wireless Hacking Tools and Encryption discovery. This complements existing Steganography, Anti-Forensics, Trojan and Rootkit detection.

In addition to v1.2, we have also released C-TAK Trial Version, a 30-day free trial, in order to provide users with a try before buy option. Interested users can obtain these applications at EnCase® App Central.

“As promised our team continues to add new discovery capabilities to C-TAK in order to support the ever-evolving threats that can impact enterprise, desktop and mobile investigations. Our team is committed to delivering the most comprehensive cyber threat discovery sets to aid investigators around the globe by integrating them with the best forensic platform available - EnCase®.” Stated by WetStone Technologies’ Founder Chet Hosmer.
