

Gargoyle Release Notes

WetStone Technologies | January 2018

- This release covers maintenance to datasets to reduce false positives.
- New threats have been added to the Anti-Forensics, Botnet, Denial of Service, Encryption, Exploit Scanner, Fraud Tools, Keylogger, Password Cracking, Peer-to-Peer, Piracy, Remote Access, Rootkit, Spyware, Sniffer, Spyware, Toolkit, Trojan, Web Threat, Wireless Tool, and Ransomware categories.
- Updated versions of previous programs have been added.
- The separate custom dataset has been updated.
 - ****Note**** This download is separate from the normal datasets.

NOTE: Our datasets are being continually updated and, despite constant analysis and filtering, the introduction of false positives is possible. We welcome any suggestions, comments and concerns regarding our datasets
