Cortland, NY, September 18, 2007- WetStone Technologies, Inc., a division of Allen Corporation of America is joining forces with the Pennsylvania College of Technology in Williamsport, Pa., to offer a one-time educational seminar in support of National Security Awareness Month, designated for the month of October.

The rapid evolution of malicious software, whether used for concealing data, destroying data, unauthorized access or identity theft is affecting business operations around the globe. The direct impact on organizations and the cost of detection, eradication and recovery is skyrocketing. The rapid evolution of digital steganography – a technique for hiding digital content inside seemingly innocuous computer files – has introduced a significant hurdle for defense, intelligence and law enforcement investigations into cyber crime, cyber terrorism, and espionage.

WetStone's Chief Scientist and Senior Vice President of WetStone, Chet Hosmer, is a nationally recognized expert in cyber security, digital forensics and steganography. In support of National Security Awareness Month, Hosmer will show attendees how the organized criminals are breaking through and how individuals can strengthen their computer defenses to keep them out.

Many law enforcement professionals and digital investigators have to pay out-of-pocket to attend training, merely to catch up on what criminals are doing today. This is an excellent way to learn about the new technologies and methods criminals are using and the tools now available to stop them.

The 90-minute seminar, scheduled on October 2, 2007 from 3:30-5 p.m. at the college, is free for the first 150 registrants. To register visit www.wetstonetech.com or call 1-877-WETSTONE ext. 2. Handouts will be distributed and light refreshments will be served.

About WetStone Technologies, Inc.- WetStone Technologies, Inc. was established in 1997 to advance digital investigation technologies and training. Today we focus our solutions

and expertise on the challenges of eCrime Investigation, eForensics and eCompliance. WetStone is a subsidiary of Allen Corporation of America (www.allencorporation.com).

About Pennsylvania College.- Penn College is a special mission affiliate of Penn State, committed to applied technology education.
