PRESS RELEASE

WetStone Technologies, Inc. and Paraben Corporation Announce Partnership

A Positive Contributing Force To The Cyber Security Community

St. Louis Missouri January 26, 2009: WetStone Technologies, Inc. an innovator of cyber security solutions and Paraben Corporation a leader in specialized computer forensics announced their partnership today at the DoD Cyber Crime Conference. These companies are joining forces to support growth in the cyber security field through the developments, integrations and advancements of their technologies.

“This partnership will have a significant impact on the cyber security field. The combined efforts of WetStone and Paraben will allow the production of technological advances that will result in new capabilities in the prevention and the investigation of cyber crime.” stated Chet Hosmer Sr. Vice President and Chief Scientist at WetStone.

Amber Schroader, CEO of Paraben Corporation, commented “It is an excellent relationship between the two companies that really forms a dynamic duo of technology and support in the cyber security and cyber crime space. We are excited to be able to offer even more to our existing customers, and help them through their investigative process.”

Both companies have been leaders and innovators in their areas of development pushing for changes to investigative and preventative techniques for years. With the combining of the two companies, crime has a new foe working against them that will be able to capture and stop wrong doing. Integration is expected to provide robust solid solutions for examiners.

WetStone Technologies, Inc.: is a global provider of innovative cyber security solutions. Since 1997 WetStone has continued to equip their customers with the research, technologies, trainings, and services that are needed to defend against today’s cyber criminals. WetStone is a subsidiary of Allen Corporation of America. (www.allencorporation.com).

Paraben Corporation: Was founded in 1999. Paraben specializes in comprehensive digital forensic solutions for handhelds, hard drives, and enterprise networks. From technology to services Paraben provides effective results and forensic-grade data. Paraben continues to provide 360 degrees of solutions in the area of digital forensic technology.
