

For Immediate Release
US-LATT is Microsoft® Windows 8 Ready

Cortland, NY – November 21, 2012, – WetStone Technologies, Inc. released the latest version of US-LATT the leading live investigation and triage solution for law enforcement. The new version contains support for the latest Microsoft® Windows operating system along with a host of other new features including IPv6 support, collection of user assist and pre-fetch data and support for NTFS token configuration.

“Staying in lock step with the latest Microsoft operating system releases is vital in order to ensure that our law enforcement, corporate and government customers have the ability to collect vital evidence from the latest live running systems”, stated Chet Hosmer, Chief Scientist at WetStone.

Current customers can obtain this upgrade free of charge by accessing the WetStone Software Portal. <http://wetstonetech.com/cgi-bin/members.cgi>.
