

PRESS RELEASE

WetStone Chosen as Distributor of AIS's WiFi Investigator

Little River, SC and Cortland, NY, October 15, 2013:

AIS is pleased to announce WetStone Technologies as a distributor of their WiFi Investigator product. Effective October 1, 2013, WetStone Technologies has assumed marketing, sales, technical support and distribution of WiFi Investigator to the global marketplace. AIS will work closely with WetStone to ensure product availability, provide product updates and address any warranty related issues. AIS's Commercial Operations Manager Dan Kalil had this to say about the agreement:

“After evaluating various distributor options for AIS's WiFi Investigator product, choosing WetStone Technologies was an easy decision. They have and continue to demonstrate their commitment to their customers, providing relevant cyber technologies that address critical needs. Their positive reputation, coupled with their proven ability to effectively promote and support product offerings is apparent and we are confident that it will result in greater product exposure within diverse markets.”

In the coming weeks, changes to the WiFi Investigator website and other outlets will occur, resulting in improved communication between existing and potential customers.

WetStone Technologies' Founder Chet Hosmer states:

“We have a long standing relationship with AIS and many of their talented staff. I have followed with great interest their innovations and commitment to quality for well over a decade. WiFi Investigator is the culmination of years of intense R&D investment resulting in the best-of-breed Wi-Fi investigation technology available today. I look forward to this new partnership and to the introduction of this leading edge technology to the global marketplace.”

WiFi Investigator provides the ability to passively identify, locate and analyze broadcasting 802.11 devices and supports a wide range of use case scenarios, including criminal investigations and security assessments.
